

## **Congratulations - Welcome to the easiest way to make money online!**

I'm not going to fill this course with a lot of 'fluff' and filler content to make it look more than it is.

I know you want to be making money online and you don't want to have to wade through 300+ pages of waffle to do it.

This system is very simple to use (you just need to follow the instructions) and is designed to have you making money from your very first day and growing the amount you make over time.

The key to the system is re-investing profits so that your income begins to compound more and more until you are earning hundreds of dollars a day in pure profit.

You **MUST** follow the steps in the order they are given, and you **MUST** complete all of the steps **EXACTLY** as they are described.

Remember, this is not the typical MLM or Get Rich Quick scheme, so if the system looks a little unorthodox to you at first, that's ok ... It's because **NO-ONE** else is teaching this stuff – but it works like a charm.

So let's get started ...

## **Step #1 – Generating your first hundred dollars or more ...**

The first step in this system will enable you to generate an easy \$100 (and probably more) from your very first attempt. It's been proven over and over again to work for hundreds of people ... but you **MUST** follow the system exactly.

To generate your first \$100 you are going to be playing at online casinos using a very special technique to exploit a major loophole.

Most people know that it's not very likely that you can walk out of a casino with more money than you entered ... but here we are playing at **ONLINE** casinos ... And ... we're **NOT** playing to win.

It's a common fact that most online casinos will offer huge cash bonuses to entice people to sign up and play. These bonuses can be as high as \$1000 in some cases.

The reason casinos do this is because they know that **MOST** people will gamble it all away trying to **BEAT** the casinos.

However, there is a way to keep your bonus **AND** your initial stake, and that's by playing to break even.

Using the first part of this system, you will be able to sign up at a casino, receive an actual cash bonus of \$200 and get to keep close to 100% of it.

## **Here's how, and more importantly, WHY it works ...**

All casino games have what's called a "house edge". This means that in the long term, the casino will always make a profit of a certain amount.

For example, in Roulette, the house edge is 5.6% for an American table. That means, on average, for every \$100 wagered, the casino will make \$5.60.

That may not sound like much, but when you consider that **BILLIONS** of dollars are wagered online, that 5.6% soon adds up. And that 5.6% is the **MINIMUM** the casinos can expect to win. Most players gamble without a strategy and will lose a lot more than that.

Other games, such as Keno, have a house edge as high as 25%!

## Ok, so how can we turn this to OUR favor?

The answer is that we play the games with the LOWEST house edge possible. From the table below, we can see that Blackjack is the best game to play.

Game	House Edge
Blackjack	0.80%
Baccarat (banker)	1.17%
Baccarat (player)	1.63%
Pai Gow Poker	2.5%
Roulette (single zero)	2.7%
Three-Card Poker	3.4%
Let It Ride	3.5%
Sportsbook Betting	4.5%
Caribbean Stud Poker	5.26%
Roulette (double zero)	5.6%
Big 6 Wheel	11.1% to 24%
Keno	25%

With the right strategy, ***the house edge on Blackjack is only 0.8%***.

This means, for every \$100 wagered, the casino can expect to make just 80c. It's not much, but still a profit to them. (And that's a "worst case" scenario for them – most people without a strategy will lose more)

So, when you sign up to an online casino and get a bonus, say \$200, by playing blackjack you can expect to give up an average of \$1.60 to the casino – leaving you with \$198.40 of your bonus left.

*Remember, that bonus was FREE money that the casino gave you, expecting you to LOSE it.*

By playing to break even (instead of playing to win like everyone else) you get to keep that \$198 as free money and withdraw it to your bank account. And, by playing with just the bonus money, you don't risk the money you put in!

You can eventually use this same strategy with as many online casinos as you want.

## **So how do you play to break even?**

If you don't know how to play blackjack it really is simple – Everybody at the table is dealt 2 cards, for all the players (including you) both the cards can be seen by everyone - The dealer always has one card hidden and one card showing.

The aim of the game is to get 21 or as close as possible to 21 (but not go over) by adding up the value of your cards.

Ace can either be 1 or 11

All picture cards apart from the ace is counted as 10

Every other card is its face value (2 is 2, 5 is 5 etc)

The best possible hand to get is a picture card and an ace (called Blackjack) as this is counted as 21 and can not be beaten, you can only draw if the dealer also has Blackjack!

If you don't have blackjack you have several options

You can 'Hit' which means get another card dealt to you from the dealer.

You can 'Stick' which means your happy with your hand and don't want anymore cards.

If you have 2 of the same cards (for example two jacks) you can 'Split' which means you double your stake and play with 2 hands, you are dealt another card for each and play each hand separately.

If you think the next card is lucky you can 'Double Down' which simply means you double your stake and are dealt just one more card – In effect you are betting that the next card will be a lucky one for you.

Now if you follow the strategy below you will be playing the perfect blackjack hand every time, and THIS can give you the playing edge.

**H = Hit**  
**D = Double Down**  
**S = Stand**  
**SP = Split**  
**SU = Surrender (if able) otherwise Stand**

You simply check your cards against the dealers with the table and make the right move as shown – It's so simple its brilliant!

Click the link below to watch a short video of this system in action. In the video, you'll see several hands being played and the end result is that we finish up with the same amount as we started.

**(Video Of Strategy In Action)** [www.EasyCasinoProfits.com/blackjackstrategy](http://www.EasyCasinoProfits.com/blackjackstrategy)

Before you get started, there are a couple of casinos that this strategy works best with (especially for beginners).

It is recommended that you ONLY start out with one of the below casinos. One casino is best for players from the USA and Australia (because of gambling laws) while the other casino accepts players from nearly all countries.

Stick with the casino for your listed region first.

**1) All countries EXCEPT for USA and Australia** → [Click Here to go to Casino](#)  
Or type this link in your browser: <http://www.EasyCasinoProfits.com/bonus>

**2) For members in the USA or Australia ONLY** → [Click Here to go to casino](#)  
Or type this link in your browser: <http://www.EasyCasinoProfits.com/usabonus>

*(If you find that your country is not supported by the first casino, use the one for USA and Australian players)*

From this point on, I will be using the first casino above for reference.

The first thing that you need to do is download and install the software so that you can play at the casinos. Don't worry, this casino is the largest in the world and all the software is verified safe to run. We run it on our machines after all.

**Click on the appropriate link above, depending on your location.**

**IMPORTANT:** The primary casino (for non-USA, non-Aus players) should auto download when you click "ok". For the USA, Aus casino, you may need to click "Download" from the website to initiate the software download.

You should see a box like this or similar. You will need to click “Open” or “Run” or if using Firefox you may have to “Save” to your desktop and then launch the file.

Again, if you get this window, just click “Run” to start the download.

Click the “Next” button to install the software.

Next, you need to click on “Money Play” on the following screen. By using your bonus money to play, you can play WITHOUT risking any of your own money!

Register yourself as a new player under the following screen:

The registration form for 888.com Money Play includes the following fields and options:

- Preferred Username:
- First Name:
- Last Name:
- Email:
- Age:
- Gender:  M  F
- Address:
- City:
- Country:
- State:
- Zip Code:
- Phone:
- I ACCEPT THE [Terms & Conditions](#)

Buttons: [Already a Member?](#), [24/7 Live Chat Support](#), [Submit Registration](#), [Cancel](#), [Help](#)

After you click the submit button, it will show you your username and password and have a button to login:

The login form for 888.com Money Play includes the following fields and options:

- Username:
- Password:
- Nickname:  (optional)
- Remember Me

Buttons: [LOGIN](#), [New User? Sign Up Here!](#), [Forgot your Password?](#), [Cancel](#), [Help](#)

Once you've logged in, you'll be presented with the main casino welcome screen. The first thing you need to do is click on the "Cashier" at the bottom left of the screen. Follow my instructions and I'll show you **how to play without risking any of your own money!**

Click on the “Deposit” button that appears next. This will allow you to add funds to your account.

When you sign up to the casino you will be given a 100% bonus on your first deposit, up to \$200, or equivalent.

e.g if you deposit \$100 you get \$100 free  
if you deposit \$200 you get \$200 free.

Why would they do this? They do it to entice you to put as much in as possible, thinking that you’re just like every other sucker who is going to end up losing a lot. But we know different...

I strongly advise that you deposit \$200 into your account so that you can get the maximum \$200 bonus. That way, you can use the bonus money to start you off and keep YOUR money safe!

You NEVER have to risk your own money and can later withdraw it. So the best approach to take is deposit \$200, play with the \$200 bonus and then later withdraw your original stake with all of your winnings.

Remember, this is the ONLY time you can get the 100% signup bonus, so the more you deposit, the more money you get for free. You should deposit the full \$200 if you can, but at least \$100 to make it worthwhile.

(These casinos will often also give you additional bonuses just for having an account with them – such as 20% on all new deposits, and sometimes \$20 just for logging in – and this is why I've listed these two as the ones to start with)

Before you can withdraw your free bonus money, the casinos require that you bet a certain amount of money first. This is where most people fail (they have no system) but by following the strategy card below, you can keep betting and betting with the house edge at just 0.8%.

Again, you can watch a video of the strategy in action below so you can SEE just how it helps you play to break even:

**(Video Of Strategy In Action)**

		Dealers Hand									

**H = Hit**  
**D = Double Down**  
**S = Stand**  
**SP = Split**  
**SU = Surrender (if able) otherwise Stand**

To play through the required amount quickly, it's best to play the multi-hand version of blackjack.

This will allow you to play 3-5 hands at once and therefore play 3-5 times quicker.

To start with, place a \$1 bet on each spot and play according to the strategy card. Treat each hand as a completely separate bet.

If you lose a hand, don't worry, just play the next hand.

Over time, you will find that you will win ~50% of your hands and lose ~50% of them – so it will average out to breaking even.

After you've reached the playing requirement, you'll be able to withdraw your free bonus money and any winnings you've collected.

This strategy works every single time.

And don't worry about casino's getting "wise" to this. There are hundreds of thousands of people playing (and losing) every single day, so you're not going to set off any alarm bells by doing this ... especially if you do it at lots of different casinos.

## Step # 2 - Compounding your income.

Now, from that first step, you should be able to withdraw ~\$400 and therefore be in profit by ~\$200 (give or take a couple of bucks from the house edge).

What you should do now is re-invest those profits at a NEW casino.

You have two choices here ...

1) Reinvest just the \$200 in free money you got

Or

2) Reinvest the whole \$400 and get even more bonus money.

In order to start growing your income rapidly, I'd advise going with option 2.

Remember, you'll get a 100% bonus so by depositing the \$400 you'll get \$400 in free bonus money. When you come to withdraw that, it'll be ~\$800.

You can then go to another casino with that \$800 and turn it into \$1600! For choosing your next casino we are going to look at casinos that offer GREATER than 100% bonuses.

Now you can take your original deposit, plus your winnings, and get anywhere from 200%-300% in free bonus money.

Because of anti-gambling laws in the USA, there is less choice to choose from in terms of online casinos accepting US players.

However, if you are in the USA, go to this website: [www.RushmoreCasinoUSA.com/bonus](http://www.RushmoreCasinoUSA.com/bonus) and click on "Promotions", there is currently a "Blackjack Special Bonus" that will pay 200%.

For example, if you deposit \$400 this time, you will receive \$800 in free money.

For all non-USA players, you can go to [www.EasyCasinoProfits.com/300bonus](http://www.EasyCasinoProfits.com/300bonus) and receive a 300% bonus – e.g. deposit \$400 and get \$1,200 in free money.

*You may be asking “well why didn’t we go with these casinos in the first place if they give higher bonuses?”*

*The answer is that you only get to use these first-time bonuses once – when you sign up.*

*And because they are so high, it’s critical that you deposit as much money as possible in order to maximize the free bonus money you get from depositing here.*

*If you chose these casinos first when you only had a small amount to deposit e.g. \$100 then your max bonus would only be \$300.*

*By playing them now, once you’ve increased your bankroll, you can claim up to \$1,200 (i.e. \$900 more). 😊*

All you need to do is follow the strategy card and play the same way as you did before. After you reach the requirements, you can withdraw your original stake and your free bonus money.

### **Step # 3 – Guaranteed Profits...**

This next section is going to cover a very profitable system that is guaranteed to work. It's called sports arbitrage and is possibly the only system where you know for a fact that you will walk away with a guaranteed profit.

#### **Here's how it works ...**

There are hundreds of different sports betting sites online, many of which will offer different odds for the different teams.

By taking advantage of the different odds at different places, it's possible to be on both teams in such a way that you'll end up with a profit, regardless of who wins.

#### **Example ...**

Let's imagine a football game is being played and two different bookmakers offer two different sets of odds for the different teams:

Bookmaker #1 – Gives team A odds of 1/2 to win (this team is favorite)

Bookmaker #2 – Gives team B odds of 5/2 to win (this is the "underdog")

You have \$100 to bet

Instead of betting on team A, or team B, you SPLIT your bets in such a way to bet on both teams.

#### **Split betting example – start with \$100:**

You put \$70 on team A to win. At odds of 1/2 you would win \$35 + \$70 (your original stake) = \$105

You put the remaining \$30 on team B to win. At odds of 5/2 you would win \$75 + \$30 (your original stake) = \$105

So you bet \$100 total and regardless of whatever team wins, you will make a \$5 profit – guaranteed!

Ok, so \$5 may not seem like much, but a 5% return on investment in one afternoon is better than ANY bank that I know of!

This was also a very modest example – you will often find different arbitrage bets that pay a LOT more than 5%. And because the return on investment is guaranteed, you can place much higher bets using your winnings from the casinos 😊

## How to find these bets?

There are places such as [www.ArbHunters.co.uk](http://www.ArbHunters.co.uk) and [www.UCantLose.co.uk](http://www.UCantLose.co.uk) that will provide you with 'arbs' for a small monthly fee. You can get ~150 different bets a month to place – all guaranteed to give you a profit.

Here's a quick screenshot of some of the results from ARBHUNTERS:

Sports Arbitrage Results & Statistics		
Below is a database of Arb Hunters' results since February 2003.		
Total arbs (since 21 February 2003): <b>11,808</b>		
Average number of arbs per day: <b>5.13</b>		
Date	Arb details	Profit
09/6/09	Combat Sport : UFC 99 heavyweight fight	2.329%
09/6/09	Combat Sport : UFC 99 heavyweight fight	1.235%
09/6/09	Combat Sport : UFC 99 heavyweight fight	24.752%
09/6/09	Combat Sport : UFC 99 welterweight fight	24.699%
09/6/09	Combat Sport : UFC 99 welterweight fight	23.913%

As you can see there – some of those arbs for a UFC fight have a profit of 24%.

This means that if you bet \$1,000 between the two fighters, you would have profited by \$240 guaranteed, regardless of who won!

With an average of 5 arbs a day you can easily start to take your winnings from each bet and use that to bet more on the next arb.

e.g. Assuming an average of 10% return on your bet and starting with \$1000 from your casino winnings, see how quickly this adds up...

### Day #1 – 5 Bets

Bet #1 = \$1,000	Return = \$1,100
Bet #2 = \$1,100	Return = \$1,210
Bet #3 = \$1,210	Return = \$1,331
Bet #4 = \$1,331	Return = \$1,464.10
Bet #5 = \$1,464.10	Return = \$1,610.51

That's a profit of \$610.51 on your first day!

## Day #2 – 5 Bets

Bet #1 = \$1,610.51	Return = \$1,771.56
Bet #2 = \$1,771.56	Return = \$1,948.72
Bet #3 = \$1,948.72	Return = \$2,143.59
Bet #4 = \$2,143.59	Return = \$2,357.95
Bet #5 = \$2,357.95	Return = \$2,593.74

So after just two days, you're in profit by \$1,593.95 ... not bad for placing a few bets 😊

The more you keep re-investing your winnings to place bets, the more you will make every day. With this kind of compounding effect, every single win will be bigger than the last – and the best part is that you know before you even place the bet, what kind of result you're going to get.

It literally doesn't get any easier than this ... Just sign up for one of the arbitrage services, check your email in the morning, place your bets and then take the rest of the day off, safe in the knowledge that you're guaranteed to be making a profit.

## Quick Recap Of The Three Steps ...

1) To generate your first profit, sign up to the relevant casino as in section one and start playing multi-hand blackjack with the strategy guide provided. By following the guide, you'll keep the house edge to a minimum and be able to withdraw almost all of your free bonus money.

Non-USA/Aus players start here: <http://www.EasyCasinoProfits.com/bonus>

USA/Aus players start here: <http://www.EasyCasinoProfits.com/usabonus>

2) Take the money you withdraw from the first casino and deposit it at the second casino for an even bigger bonus. Continue to play using the strategy card and you should be able to withdraw ~\$800-\$1,200 in free bonus money.

Non-USA players go here: [www.EasyCasinoProfits.com/300bonus](http://www.EasyCasinoProfits.com/300bonus)

USA players go here: <http://www.RushmoreCasinoUSA.com/bonus>

3) Take these new winnings and use them to bet on guaranteed profitable sports events using the arbitrage system. Continue to place bets every day and re-investing your winnings for bigger and bigger payouts.

Try sites like [www.ArbHunters.co.uk](http://www.ArbHunters.co.uk) and [www.UCantLose.co.uk](http://www.UCantLose.co.uk)
