Congratulations!!

This **SPECIAL UPDATED** report will show you exactly how you can profit from the online casinos and beat them at their own game.

It's NOT complicated, and you DON'T need a degree in mathematics or statistics to profit with this system. The instructions are so simple and easy to follow that even a 6 year old could play and still win (provided he had his Daddy's credit card to sign up in the first place! 😊)

But seriously, the only thing you need to do is follow the instructions EXACTLY. It's extremely tempting to be greedy with this, but that is the worst thing you can do. This is like a "recipe" for winning, if you don't follow the recipe, something is likely to get burned ... your wallet!

How To Make \$200 In Just 10 Minutes – Guaranteed!

Ok, first of all I'm going to give you a couple of rules - for your OWN good.

- 1) You must follow these instructions exactly.
- 2) You **MUST** follow these instructions **EXACTLY!!!**

I really want to stress this point. The whole idea of a "system" is that it is a plan to follow. If you don't follow it, then you're just another gambler throwing money down the drain...and I know you don't want to be that!

I want you to read through this document the whole way before you get to any betting (and winning). This book is not very long, and the tiny effort you make now will be worth hundreds if not thousands to you in the future.

As you may or may not know roulette is a game based on odds and the law of averages. The casinos know this – and they know how to use those laws of averages to their own benefit. What we've done here, is turned the tables. We're not breaking any laws of averages, or anything like that, we are simply "manipulating" to our own advantage.

Once we know how to do this, we pretty much guarantee that we'll win every single time we play. Pretty cool huh? 😊

With that said, this system has been tried and tested to work for a specific casino. Every casino online is different and uses different algorithms to determine their 'random' outcomes. For that reason, we **STRONGLY** advise that you play this particular casino. You cannot blame us if you go to

another casino and end up losing your hard earned money. Stick with what works!

Step #1 – Download The Software

The first thing that you need to do is download and install the software so that you can play at the casinos. Don't worry, this casino is the largest in the world and all the software is verified safe to run. We run it on our machines after all.

[Click Here To Download The Software](#)

If clicking that link doesn't download it, copy the following link into your browser:

<http://www.EasyCasinoProfits.com/download.php>

***** Important Note For USA Players *****

If you are in the USA you wont be able to use the casino software above. For USA players, you are recommended to use the link below as this casino will accept players from the USA.

For USA Players Only: <http://www.RushmoreCasinoUSA.com>

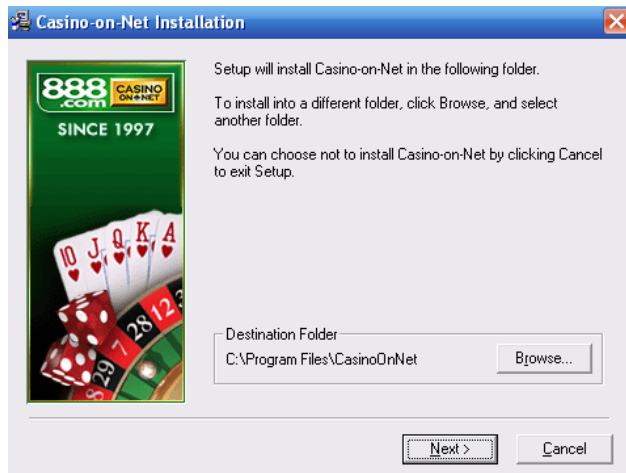

You should see a box like this or similar. You will need to click "Open" or "Run" or if using Firefox you may have to "Save"

to your desktop and then launch the file.

Again, if you get this window, just click "Run" to start the download.

Click the "Next" button to install the software.

Next, you need to click on "Money Play" on the following screen. You don't need to try the Practice as we'll show you a way to play WITHOUT risking any of your own money!

Register yourself as a new player under the following screen:

NOTE: For US players that want to take advantage of this system, you can do so but you should use the casino below.

For USA Players Only: <http://www.RushmoreCasinoUSA.com>

Once you've logged in, you'll be presented with the main casino welcome screen. The first thing you need to do is click on the "Cashier" at the bottom left of the screen. Follow my instructions and I'll show you **how to play without risking any of your own money!**

Click on the “Deposit” button that appears next. This will allow you to add funds to your account.

Here is where you can play without risking any of your own money...

When you sign up to the casino, they will give you a bonus of 100% of your first deposit up to a maximum of \$200 (About £107 at time of writing).

Why would they do this? They do it to entice you to put as much in as possible, thinking that you’re just like every other sucker who is going to end up losing a lot. But we know different...

I strongly advise that you deposit \$200 into your account so that you can get the maximum \$200 bonus. That way, you can use the bonus money to start you off and keep YOUR money absolutely safe!

You NEVER have to risk your own money and can later withdraw it. So the best approach to take is deposit \$200, play with the \$200 bonus and then later withdraw your original stake with all of your winnings.

(If you cannot afford the \$200 just yet, we recommend that you put in at least \$100 (~£53). You want to get as much bonus money as possible to play with initially so it is well worth doing it now. You only get a 100% bonus on your first deposit.

*Note: **For US players**, it is not possible to use a debit/credit card. Click the "NETELLER" tab instead. On the next page, there is an option to sign up for a NETELLER account which you can fund using your Visa card or from your bank account. You can then make your deposit from the funds within this account!*

Now, with the \$200 bonus deposit you can play using the EasyCasinoProfits system 100% risk free. If you do make a mistake (i.e. you DIDN'T follow the instructions) then you still have not lost a single penny of your own.

We recommend that you leave this \$200 in your account as the casinos look more favourably on accounts with money always in them, and in some cases this can help you get much further in beating the 'system'

Now let's move on to the good stuff. How YOU can beat the system....

How To Make Hundreds A Day At The Roulette Table Following This "Idiot Proof" Formula!

Here is where the system starts to work.

Once you've made your deposit of \$200 (or at least \$100), you need to click the "Roulette" option on the left of the Lobby screen.

If it asks you, choose a "Private" table i.e. just you on your own and also just the "Standard" betting limits i.e. \$1-\$300.

Remember, the secret is not to be greedy – that's exactly what they want you to do, and that's exactly how they make their money. Follow the rules and don't be a sucker! 😊

This system utilises a simple formula to double your initial stake everytime you play.

First you need to understand what the table looks like....

There are just two sections you'll be betting on – the Red Diamond and the Black Diamond (located just below where it says "Middle" on the screen above)

All you will be doing is betting on red or black, depending on the previous results. It's simple but it WORKS!

If you don't understand it yet don't worry, here is how you play it. Just follow these rules.

- 1) As a new player you can spin the wheel without betting yet.
- 2) You need to look for a specific sequence in the numbers when there are three red numbers or three black numbers that come up in a row.
- 3) Once that happens, you bet \$5 on the opposite one e.g. if three blacks come up in a row, you bet \$5 on red.
- 4) Normally, a bet on just the colours will give you just below 50% odds – there are 18 reds out of 37 total numbers (including zero) – the odds are $18/37 = 48.6\%$
- 5) By waiting for a sequence of one colour, you are increasing the probability that the other colour will come up.
- 6) The probability of getting two of the same colour in a row is $(18/37) * (18/37) = 23\%$. This means the chance of getting the other colour is 77%
- 7) The probability of getting three of the same colour in a row is $(18/37) * (18/37) * (18/37) = 11\%$. This means the chance of getting the other colour is 89%

8) You waited for three in a row, so on the fourth run, the probability has increased even further to 94.4%. You are pretty much guaranteed to win! When you win, you'll win your \$5 stake PLUS another \$5.

So what happens if you don't win on the fourth spin?

Simple, you just double your next bet to \$10 but keep betting on the same colour!

This time the probability of winning is 97.3%

If you win this time, you'll get your \$10 stake, plus \$10 profit. So even if you lost the first bet, you're still \$5 up.

If again you lose, just double your bet to \$20. Now the probability of winning is 99.7%. Again, you'll win back \$20 which will leave you \$5 up.

So long as you use the casino I recommend you are pretty much guaranteed to win. I have never seen a run of more than 6 of the same colours in a row, but even if you do, so long as you double your bet each time, you'll always make a profit when you do win.

The IMPORTANT thing is that when you do win, you start back at \$5 again.

Since you are only waiting for a sequence of three of the same colours in a row, you will find that you can play many 'rounds' of this very, very quickly. Even though your profit is only \$5 each time, you can literally play a round every 2-3 minutes which works out at \$100-\$150 an HOUR just starting out.

Pretty cool 😊

TIP

Once you become more confident with the system you can start playing with bigger stakes. e.g. Instead of starting every bet with \$5, start it with \$10. So long as you keep doubling it if you lose, you'll always make a profit in the long run.

Just don't get greedy – start out slowly and build up. I've seen people jump in with \$25-\$50 bets and lose a fortune.

It's better to build up \$5-\$10 each time and do it consistently. Like I said, \$150 an hour is easily achievable with this system. Spend just an hour a day at it and you're making $7 * \$150 = \$1,050$ a week!

There are a couple more pointers that you must take into consideration:

- 1) Never spend more than 30 minutes at the same table. After this time, the tables seem to get harder to play. Don't ask me why! But the best thing to do is exit out and start again on a 'fresh' table.
- 2) Do NOT get greedy – You HAVE to be disciplined and follow this system. Any deviation and it can go wrong, but stick with it and you can easily generate \$400-\$500 in just an hour or two of playing.
- 3) If at any time you're not comfortable with the way things are going, just quit. There's no point going bankrupt if you have one bad day. It's better to leave and come back again later.

Here's a quick review of what to do:

- 1) Click on the link below to install the software and click "Money Play" to set up a new account:
<http://www.EasyCasinoProfits.com/download.php>
- 2) Use the "Cashier" function to make a deposit. Use Debit or Credit card for instant funding. (US players use the NETELLER function)
- 3) Deposit \$200 to get the maximum \$200 bonus. If you can't afford this, make sure you deposit at least \$100 to make sure you can start playing with bonus money and therefore keep YOUR money safe.
- 4) Choose the Roulette table – a private table with standard stakes.
- 5) Spin the wheel without betting until one colour hasn't turned up for 3 spins.
- 6) Start betting with \$5 and then double it if you lose, but keep betting on the same colour.
- 7) Once you win, go back down to \$5 again and play another round.

That's all there is to it! It's incredibly simple, but like I said, you have to be disciplined and stick to it.

As a final note, feel free to give this report away to any of your friends, family or contacts that you think will benefit

from this. This book was written to help "The Little Guy" like you and me beat the big casinos.

Once you've put this system to the test you'll want everyone else to experience the same success that you have.

The only restriction is that you must leave the content intact – do not change it or you could end up giving someone the wrong information!
